Scorecard

Key finding: Overall Defect Rate is 6.24 per inspection. Hollywood (12.5) and Baida (9.7) run far above the other five suppliers (2.7 to 6.3). The peak of 15 on 16 Feb is one Baida inspection with 15 horizontal defects: an outlier, not a trend.

ROOT CAUSE ANALYSIS

Defect Rate
6.24

Fabric_Type	Supplier_Name	Total Defects	Defect Rate
Mixed/Sourced	Hollywood by H. Textiles Company	588	12.51
Linen	Shanghai Baida Linen & Cotton Textile Co. Ltd	243	9.72
Cotton/Linen Blend	Shenzhen Changyu Spinning & Weaving Industry Co. Ltd	212	5.58
Cotton/Silk/Linen	Zhejiang Hongrui Textile & Garment Co. Ltd	190	6.33
Cotton	Chaudhary Textiles Private Limited	127	3.18
Linen	Kottex Industries Private Limited	104	2.74
Cotton	Amrita Fashions	95	2.97
Total		1559	6.24

Key finding: Mixed/Sourced has the most defects (588), most commonly Hole (168), all from Hollywood, its only supplier, so fabric and supplier effects can't be separated. Within Linen, Baida (9.7) and Kottex (2.7) differ about 3.5x, pointing to supplier practices. Based on 250 inspections over about 10 weeks.

Total		1559	6.24	15.38	250

Defects by Type

Recommendation: Prioritize a corrective-action review of Hollywood and Shanghai Baida: together they cause about 53% of defects (831 of 1,559). Certification is a separate sustainability criterion: only 1 of 7 suppliers lists one (GOTS), and it doesn't predict lower defects here. Based on 250 inspections; confirm with more data.
